DETAILED ACTION

1. Claims 1-10 are pending.
2. Based upon Applicants remarks filed May 28, 2008, the election of species requirement is withdrawn. The claims are examined as a whole.
3. The Preliminary Amendments filed April 1, 2005 and May 28, 2008 have been considered.
4. At page 1, after the title, the continuing data should be updated.
5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
6. Claims 1 and 3 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

It is suggested that the term "derivative" should be amended to read as a "compound".
7. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.
8. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation

Art Unit: 1625

under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

9. Claims 1-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over BASF A.G. (Reference AB, cited by Applicants) in view of Wakabayashi et al. (Reference AQ, cited by Applicants).

BASF A.G. teaches an aryl cross-coupling reaction in which a 2-benzene sulfonyl pyridine compound is reacted with an organic magnesium or zinc compound. At page 2, see the reaction scheme which is depicted as follows:

The difference between the prior art process and the instantly claimed process is the aromatic ring (carbocyclic versus heterocyclic) at the 2-position of the pyridine ring.

Wakabayashi et al. teach a similar cross coupling reaction wherein the final product is heterocyclic at the 2-position of the pyridine ring. It would have been obvious

to one of ordinary skill in the art to interchange one aromatic ring for another in the cross coupling reaction in view of the similar chemical properties. Accordingly, the process is an obvious variant therefrom.
